

# **ITECH-282 - Fall 2019**

## **Mid-Term Exam**

For the mid-term, Look to the exam objectives for the CompTIA A+ 1001 Core 1 exam.

Here is the list of possible exam objectives that you should make sure to study for the mid-term:

### **3.0 Hardware**

The first half of the semester was largely hardware-based, and familiarizing ourselves with the bulk of the the baseline terminology.

#### **3.2 Common Connectors**

Molex is the only one on this list that was specifically mentioned in the material studied so far.

#### **3.3 RAM**

Know all the basic RAM types. Everything in this objective is fair game for the mid-term

#### **3.5 Motherboards, CPUs, add-ons**

This is also all fair game.

#### **3.7 Power Supplies**

Everything here might be on the exam. Pay attention to the possible voltage typo.

## **5.0 Hardware and Network Troubleshooting**

### **5.1 Basic Problem-solving workflow**

Have a good idea of the basic steps to identify and troubleshoot issues.

## **5.2 Troubleshoot motherboards, RAM, CPUs, power**

Pretty much everything here is fair game.
